IMPACT RESISTANCE	THERMAL SHOCK RESISTANCE	RESISTANCE TO SOLAR RADIATION	CHEMICAL AND STAIN RESISTANCE
EN ISO 19712-3 EN ISO 19712-2 · Certified ball drop impact resistance.	EN ISO 19712-2 · Certified dry heat resistance at 180ºC. Damp heat resistance at 100ºC. UNE EN 263 · Thermal stability certificate.	UNE EN 263 · Certified colour fastness to light.	UNE EN 263 · Certified chemical and stain resistant.

Properties

HIGH QUALITY

Thanks to the quality of its raw materials and the rigorous control of its production process, Solid Bath has successfully passed the certification and homologation exams of the AIDIMME institute, which allows us to offer our customers a 5-year guarantee for their satisfaction.

MOULDABLE

Solid Bath is manufactured by injection moulding in closed moulds, so the only limitation in its shapes is our own imagination. The pieces are joined together by polymerised chemical fusion using Solid Bath in its liquid state, resulting in a single element.
Customisable and totally made-to-measure solutions, as well as functional and aesthetic.

HYGIENIC

As it is a pore-free and seamless material, it maintains a completely hygienic surface. Solid Bath surfaces are resistant to bacteria and humidity. Easy to clean and maintain, reducing the risk of infection and disease transmission. Suitable for cleaning with disinfectants, bleach and most abrasive products.

REPARABLE

Solid Bath resists all types of impact, its advanced composition allows for easy and simple repair with the simple use of sandpaper. Severe damage caused by misuse can be repaired on site without having to completely replace the material.

· Scratch repair: As it is homogeneous and solid throughout its thickness, it can be easily sanded and repaired by the user himself.

· Breakage repairs: In case of breakage, on-site repair is possible thanks to our liquid joint and repair product.

CLEAN & LONG-LASTING

Solid Bath products, thanks to their intrinsic properties, are highly resistant to stains from many external agents.
With a single wipe, the user can remove even the most difficult stains. Suitable for cleaning with disinfectants, bleach and most abrasive products.
